✉ danielledgar097@gmail.com ☎ 0112836014 📍 Nairobi, Kenya

PROFESSIONAL SUMMARY

Driven and analytical IT professional with a strong foundation in full-stack software development, cloud infrastructure, and IT project management. Adept at implementing technology strategies, managing project resources, and maintaining strict development timeframes. Proven ability to ensure compliance with organizational standards, conduct technical risk assessments, and coordinate effectively within collaborative environments. Eager to apply cross-functional technical expertise and structured project oversight to the IT Program Officer role.

PROFESSIONAL EXPERIENCE

Technical Project Lead & Developer, Independent Software Developer 10/2022 – Present

- Set comprehensive project goals and formulated strategic development plans to successfully deliver applications using Django, React, and Flutter.
- Maintained strict project timeframes and monitored resource expenditures, including managing cloud resources via AWS free-tier and Firebase.
- Implemented effective IT strategies to transition projects from concept to deployment on schedule, utilizing Docker for containerization and optimizing self-hosted servers.
- Conducted regular technical risk assessments to ensure secure database integration, API reliability (including Daraja M-PESA), and robust application architecture.

ICT Attaché, Kenya Revenue Authority (KRA) 01/2026 – 04/2026

- Monitored daily IT operations and system performance, reporting progress and potential technical issues to management.
- Ensured strict compliance with organizational policies, data security procedures, and IT standards at the Kitale Tax Service Office.
- Compiled accurate status reports and assisted in managing compliance tasks and internal records.

EDUCATION

Kenya Certificate of Secondary Education, St Joseph Boy's Highschool 01/2018 – 03/2022
Kitale

Bachelor of Science in Information Technology, Kabarak University 09/2022 – 03/2026
Nakuru

- Coursework completed with a focus on Database Management Systems, System Analysis, and Network Security.

Skills

IT Strategy & Technical Operations

- **IT Strategy Implementation:** Designing and executing technical roadmaps to deliver software and infrastructure projects on schedule.
- **Technical Risk Assessment:** Evaluating cybersecurity principles, system architecture, and integration points (e.g., APIs, payment gateways) to mitigate project risks.
- **Systems Engineering:** Full-stack software development (Django, React, Flutter), cloud infrastructure management (AWS, Firebase), and containerization (Docker).
- **Compliance & Quality Assurance:** Ensuring IT operations meet organizational policies, security standards, and operational procedures.

Project & Resource Management

- **Project Lifecycle Management:** Setting goals, monitoring progress, and maintaining strict development timeframes from concept to deployment.
- **Budgeting & Resource Allocation:** Monitoring project expenditures, estimating costs, and optimizing the use of technical resources (e.g., cloud storage, server utilization).
- **Reporting & Documentation:** Compiling comprehensive status reports, tracking compliance logs, and clearly communicating technical problems to management.

Leadership & Coordination

- **Team Coordination:** Organizing cross-functional technical teams, developing schedules, and delegating individual responsibilities.
- **Agile Problem Solving:** Adapting project plans on the fly and implementing necessary structural changes to keep objectives on track

Languages

- English
- French

CERTIFICATIONS

Data Science Africa (DSA)

Intensive training in data-driven modeling, statistical analysis, and visualization techniques using Python-based libraries.

Advanced Windows System

Customization

Technical proficiency in registry modification and system optimization tools.
